

Trim & Extend Tool

Blender Bonsai add-on for interactively trimming and extending IFC elements.

Features:

- ✓ Trims or extends IFC extruded elements (including void elements) with or without axis.
- ✓ Multiple elements modification during tool use.
- ✓ Interactive representation of modification path and values
- ✓ Void elements like openings stay put or will be deleted if not inside extrusion anymore
- ✓ Bonsai 0.8.5 + compatible
- ✓ Undo is supported. Modifications can be reversed with ctrl+z.
- ✓ Supports direct trim or extend values or target point selection with optional offset value.
